The student gave an oral presentation of around 10 minutes talking about expectations, mostly focused on communication in their 3-5s.

Great use of vocabulary, conveyed and appropriate. Very good use of phrasal verbs and idioms.

She presented the topic in a captivating way, making appropriate pauses and different intonations that helped to get her message across. Great speed delivery.

There was a repetitive use of the question "you know what I mean?" used as a filler, something to work on.
